4. The highest bidders in the sale must pay up their bid amounts in full immediately after the close of the sale and remove the articles so purchased at once from the premises of the Office. The purchaser can not make this office responsible for any loss of his purchased articles that may result due to his delay in conveying the same.

5. Failing any or both of the conditions inposed in para 4 above by the purchaser; it is open to the President, Municipal Council, to resale the articles at the risk of the original highest bidder. Any loss sustained to the Municipality will have to be made good by the original purchaser, but he will not be entitled to any profit that may result by the resale.

6. The President of the Town Municipality, Arsikere, has the full power to dispose the sale by way of confirming or otherwise, without assigning any reasons therefor.

7. The deposits of all the bidders excepting that of the highest bidder will be returned immediately after the sale.

8. Enquiries may be made in the Municipal Office, Arsikere for any other particulars.

1372 .....*President.*

To

The Firms dealing in Water Meters.

Enquiry No. 8356.

Water Meters required for Water Supply Division.

Dear Sir/Gentlemen,

No. S.P.C. 31985-2000. Please be good enough to intimate your best prices and the earliest time of delivery for the materials described in the undermentioned schedule.

It should be distinctly understood that the acceptance by us of your quotation will be subject to the following conditions :—

Withdrawal from the quotation after it is accepted or failure to make the supply within the specified time or according to specifications will entail cancellations of the order and purchases being made at your expense from other sources in addition to the levy of a penalty of 3 per cent of the value of the order as and by way of liquidated damages. In such an event, the Stores Purchase Committee reserve the right to remove your name from the list of approved firms.

The quotations should be superscribed "Quotations for Water Meters required for Water Supply Division" with the above enquiry number.

This enquiry will be closed on the 26th June 1947.

SCHEDULE.

		Quantity
1	½" Water Meters	800 Nos.
2	¾" Water Meters	75 Nos.

SPECIFICATION OF METERS REQUIRED FOR MYSORE CITY.

1. The meters shall be of the inferential fan type or the semipositive disc type and shall have a dry dial and circular reading index. The size now required is ½".

2. They shall be suited generally for horizontal installation.

3. Every meter shall be guaranteed to work automatically at least for two years without repairs or renewals of spare parts when dealing with water which may contain 1 R. P. M. of residual chlorine and a small trace of iron also.

4. The meters may register either way backward or forward.

5. The accuracy of registry in the meters over varying rates of flow of water shall be guaranteed up to 2 per cent for all sizes between the ranges of 12 gallons and 500 gallons per hour.

6. The minimum rate of flow of water capable of being registered by the meters shall not be more than six gallons per hour.

7. The maximum temperature of the water passing through the meters shall not be more than 105° F and every part of the meter shall be guaranteed to work unaffected by expansion or contraction or warping or deterioration between the temperatures of 60°F and 105°F in the City.

8. All the parts of the meter shall ensure extreme accuracy of sizes in manufacture enabling interchangeability and ease in removing and refixing of the required parts.

9. The manufacturer shall supply with the meters the test reports and charts giving full details of the variation in the rates of flow under different conidtions of head of water.

10. Every meter shall be fitted with a properly sealed adjusting device for making adjustments during repairs. The meter shall also be provided with arrangements for locking it with lead seals so as to prevent manipulation of the index by unauthorised persons.

11 As far as possible, the meters shall be provided with spur gear or bevel gear drives, both for the indexing drygear and for the regulating wet undergear.

12. Similarly, the meter shall not consist of any parts liable to deteriorate under water or corrosion by electrolytic or chemical action.

13 Every meter supplied shall be accompanied by a certificate testifying the body of the meter being proff against a pressure up to 400 lbs. per square inch and the whole meter tested with running water up to 150 lbs. per square inch.

14. *The following special specifications shall also be complied with* :—

(1) Body of the meter to be of strong construction using non-corrodible metalee alloy preferably non-ferrous.

(2) Strainer :—of a capacity of at least four times the sectional area of the diameter of pipe and to be made of a non-corrodible metal.

(3) Two piece or pivot also non-corrodible and mounted on jewelled bearings.

(4) Fan or vane wheel shall be free from chemical or electrolytic action and shall be nearly of the same density as of water.

(5) Entry of water to the meter shall preferably be even on all sided of the fan and not such as to cause any side thrust on the spindle in any particular direction.

(6) Regulator of index gears shall be also on non-corrodible materials with parts cut most accurately. They shall be so housed as to be protected from any any foreign substances tending to clog their working. The stuffing box separating the two gear systems shall be provided wit bronze of other bushings and the bearings shall be such as to minimise friction as well as wear.

(7) Dial shall be of bold and clear figures reading upto 1,00,0,000 gallons before being set back to zero again. The enamelling and figuring shall be such as not to get effeced easily. The dial plate shall be made of a light yet strong material not likely to chip off at the edges.

(8) The glass cover should be attached in such a way that it should not become covered with moisture from the inside. In the alternative it shall have an arrangement to wipe off the moisture, if any, collected when the meter is to be read periodically.

N.B.—1. The prices to be quoted should be for delivery f.o.r. Bangalore and Mysore.

2. Complete specification with illustrated pamphlets or catalogues of the water meters offered should accompany the quotation,

9035

Dated 5th June 1947.

To

The Firms dealing in Gun Powder.

Enquiry No. 8357.

Gun Powder required during the year 1947-48.

Gentlemen.

No. S. P. C. 31970-72. Please be good enough to intimate your best prices for the material described below :—

Good and dry gunpowder for blasting purposes. The composition of the material should be in the proportion of 75 : 10 : 15 by weight of saltpetre, sulphur and charcoal respectively, its density being in the neighbourhood of 1·8.

It would be distinctly understood that the acceptance by us of your quotation will be subject to the following conditions :—

1. The quotation should be for one pound of the material delivered free on rails at any Railway Station in the State, and should be firm for one year during which period the materials will be drawn on indents in such quantities as may be required from time to time; the indents being complied within a fortnight from the date of receipt.

2. In case of doubt as to whether the supply conforms to the specification, the Stores Purchase Committee reserve the right to draw samples from the supply and get them tested
